**Table 10- The means of accuracy by direction. Users were asked 3 questions on direction pertaining to the graph. Users could have between 0 and 3 correct answers.**

| T-Test    | Graph 1  | Graph 2  | Graph 3  | Graph 4  | Graph 5  |
|-----------|----------|----------|----------|----------|----------|
| Bio-CS    | 0.749825 | 0.760428 | 0.680235 | 0.930004 | 0.103552 |
| Bio-Other | 0.303623 | 0.408202 | 0.119098 | 0.072129 | 0.373901 |

**Table 11- The t-values of user confidence. Biologists' (bio) scores were compared to the scores of computer scientists (CS) and people of other majors (other) no significance was found.**

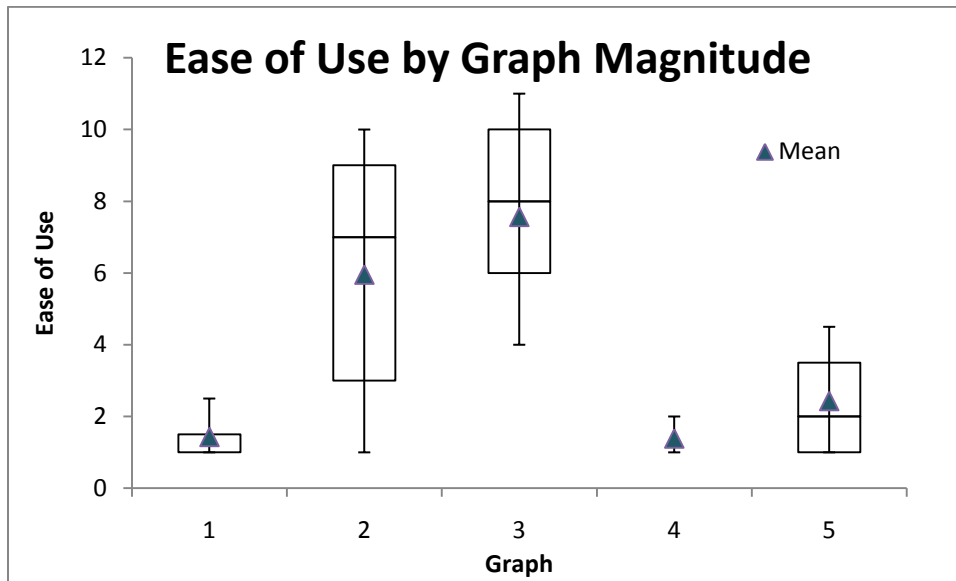

Figure 9 The average self-reported score of the ease of use in magnitude. Each user was asked to rate how easy or difficult they found it to answer the questions pertaining to magnitude. Answers were scored from 1 to 10, with 10 being the most difficult. Both the mean and median are shown.

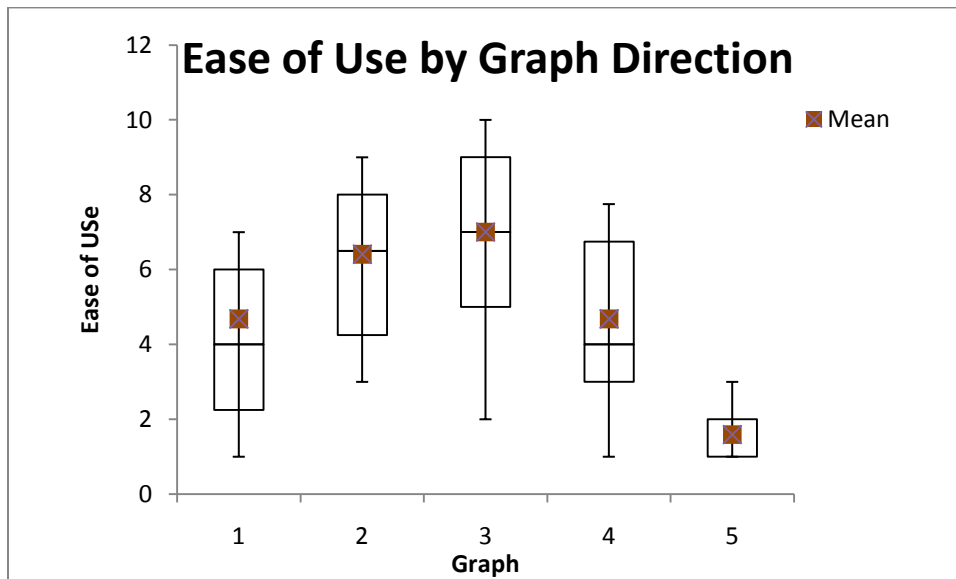

Figure 10 The average self-reported score of the ease of use in direction. Each user was asked to rate how easy or difficult they found it to answer the questions pertaining to direction. Answers were scored from 1 to 10, with 10 being the most difficult. Both the mean and median are shown.
