

Developmental Robotics

Robotics

Faculty: Alex Stoytchev

Grad Student: Volodymyr Sukhoy

Interns: Veselin Georgiev, Ramy Sweidan, Todd Wegter

The mission of the Developmental Robotics Laboratory at Iowa State University is to create autonomous robots that are more intelligent, more adaptable, and more useful than the robots of today which can only function in very limited domains and situations. We approach this problem from the point of view of Developmental Robotics which is a new field that blends the boundaries between Robotics, Artificial Intelligence, Developmental Psychology, Developmental Neuroscience, and Philosophy.
