TWiki Tip of the Day
Disabling individual WikiWords

Prevent a WikiWord from being linked by prefixing it with an exclamation point.
 Example: To escape SunOs ... [Read on](#)

Magic Table

The Magic Table is a project which applies augmented reality (AR) technology to a table top environment. Using a camera and computer vision algorithms, a user can look through a virtual window

and see his or her own hands displayed alongside virtual objects. Manipulating these virtual elements is done with hands-on, real world interactions, eliminating the need for input devices. This setup allows one or more users to interact intuitively in 3D. The goal of this project to construct a new desk as well as build application(s) to go with it.

The Team

Eliot Winer?	Faculty member
Marisol Escobar Martinez?	Graduate student mentor
Andrew Koehring	Graduate student mentor
Samantha Levine	Intern tasks?
Travis Christian	Intern
Matthew Scheinerman	Intern
