Developmental Robotics

Public Group active 4 years, 5 months ago

Group Admins

Developmental Robotics
Faculty: Alexander Stoytchev
Graduate Students: Vlad Sukhoy and Shane Griffith
REU Interns: Vasha Dutell, Philip Koonce, Jose Farrington

The REU students in this group will be expected to formulate a research project on their own with some help from the faculty and graduate students at the Developmental Robotics Laboratory. Furthermore, the REU students will be expected to perform a large-scale experimental study with a state of the art upper-torso humanoid robot and summarize their results in a research paper that will be submitted to one of the top conferences in robotics. The research topic is flexible as long as it is aligned with the mission of the lab.
