WEEK 10 My Final Address!!!!

Posted on [August 3, 2011](#) by [Sharrod](#)

Its pretty much all over we do our run through tomorrow and then Fri we present I am ready to just get this done with. This has been a fun 10 weeks but I am just happy that I finished strong and that my group has accomplished a lot since the beginning! This has been a great experience for me one i wont forget thanks a lot everyone that is in charge of the program for having me here at ISU!!!

I want to leave everyone with one last nice sight from before they leave...I also have learned a lot about modeling since I have been here which is another great thing especially want to thank Ted!!! This image was constructed by me... 😊

Almost Complete....

Posted on [August 1, 2011](#) by [Sharrod](#)

I am glad my group is pretty much finished we have all the materials we need for the poster and paper pretty much complete everything is in order right now! All I can say is I am glad i am apart of Team Vet Med!

Finished with one part on to another

Posted on [July 22, 2011](#) by [Sharrod](#)

We finished up user testing yesterday it was a joyous day now it is time to do data analysis! I here that it is a real drag but someone has got to do it so yea. Its been a nice summer and internship with only two weeks left everything is slowly coming to an end. It is nice to see how much everyone has learned from their projects since the day we all started. I look forward to taking all this knowledge back with me but now I must get back to work!

Beginning of animating a ninja...more to come!!!

Posted on [July 15, 2011](#) by [Sharrod](#)

Today I made a ninjas knees bend its only not too fascinating but a big step from where i came from. It took 30 mins just to do this one second animation that's just the life of a animator. lol Sort of like a programmer. Here is the video: click on the link below

[ninja bending knees](#)

Thanks a lot Ted for the direction you gave. I am well on my way!

We have been through a whole heap of work!!!

Posted on [July 15, 2011](#) by [Sharrod](#)

This has been a great internship with only 3 weeks to go I feel like I have accomplished a lot and learned a lot at the same time. The project is in its final stages next week we plan to be testing people to see what type of responses that we will get about out prototypes. WE have a meeting at 3 since Ryan is just back in town to really make sure that things are into place and what the next steps to take are. Its been fun here but I am starting to get a little home sick so yea I hope these next few weeks breeze on by!

ANIMATION

Posted on [July 14, 2011](#) by [Sharrod](#)

I had a good talk with Ted about animation and modeling and he gave me some

pointers on some of the things I should do to help me become a better animator/artist. Which means going back and watching a bunch animated movies and cartoons. So that means I ll probably watching Tangled and a Bugs Life very soon. lol The group project seems to be coming along just fine everyone is attacking their assignment and close to getting everything done and ready for testing! Almost done with week six this summer has flown by and that is amazing. P.S. I LOVE ANIMATION HENCE THE TILE!!!

How does the research presented relate to your own experiences and beliefs regarding racism?

Posted on [July 13, 2011](#) by [Sharrod](#)

I feel it goes along with the fact that if you taught or group up to know or feel that another culture or type or person is “wrong” in a way you will begin to believe that. In gangs with the crips and bloods red and blue means you are enemies and it was instilled into these gang members that they are not suppose to like the other person wearing that certain color. So yea that is what I feel. Racism is still alive and just prejudice itself not even necessarily racism just pre-judging someone by the color of there skin or where they are from or what they are wearing! Its still prevalent today much so!

Rainbows and Unicorns

Posted on [July 12, 2011](#) by [Sharrod](#)

I love rainbows and I want a unicorn an evil unicorn though with flames for a tail! Today is pretty chill this feels like it will be a smooth week I have no complaints so far so yea. The group is always meshing together well...everything about Vet Med is just smooth. I cant wait until we get through this week and the next so we can be done with the testing and then just focus on the poster and paper which is pretty much complete. I like how things are coming along!
