March 11, 2016

Bryanna Joyce Davison
 Santa Rosa Junior College

Dear Bryanna,

I am pleased to inform you that you have been accepted to the “NSF REU Site: EXERCISE - Explore Emerging Computing in Science and Engineering” program for the summer of 2016. Congratulations!

You will receive a stipend of \$5000 for the summer REU program. Up to \$600 travel allowance will be provided to cover reasonable travel cost to the REU site from your home or home institution. You are also provided with on-campus dormitory-style housing and meal allowance for the length of ten weeks you are enrolled in the REU EXERCISE program at Salisbury University.

The NSF REU EXERCISE program will be hosted in the Undergraduate Research Computing Lab (HS101) which is housed in Henson Hall. The program will start on June 6 and end on August 12, 2016. We expect you to be at the REU EXERCISE site for the entire period. You should not have a summer job during this period or be enrolled in summer classes since the program is designed to be a full time intensive research experience. We also expect you to be part of an online pre-summer workshop. Once on campus you must attend scheduled meetings, field trips, and social activities. You must discuss research progress with advisors, provide progress and final written reports, and give a poster and oral presentation during the last week of summer program. You must work at least 40 hours per week. Acceptance of this offer is commitment to conditions described above.

Most of the details about our program can be found on our web page at the URL <http://faculty.salisbury.edu/~ealu/REU/REU.html>. We would like to have your response to this offer by March 18, 2016. Your earliest response is appreciated. After we receive your signed acceptance letter, we'll send you more information about the REU summer program. Should you have any questions, please feel free to email me at ealu@salisbury.edu or call me at (410)543-6144. I do hope you accept the offer.

Sincerely,

Dr. Enyue (Annie) Lu
 Director of NSF REU EXERCISE SITE
